

Risk Matrix – StockWise Project

Risk	Probability	Impact	Risk Level	Mitigation / Preventive Action
Data Loss	Medium	High	High	Regular database backups, transactional operations, secure storage, disaster recovery plan
Security Breach	Low	High	Medium	Role-based access control, strong passwords with BCrypt, HTTPS/TLS, security audits
System Performance Issues	Medium	Medium	Medium	Continuous performance monitoring, query optimization, caching, load testing
Integration Issues	Medium	Medium	Medium	Document APIs, integration testing, version control, staging environment testing
User Errors	High	Medium	Medium	User-friendly UI, confirmation prompts, training, audit logs
Server / Deployment Failures	Low	High	Medium	Reliable hosting, monitoring & alerting, automated deployment, rollback plan
