

Payroll & Timesheet Management – StockWise Project

Overview

The Payroll & Timesheet Management module is designed to track employee working hours, manage attendance, and calculate payroll efficiently within the StockWise system. This module ensures accurate recording of employee time and automates salary calculations based on defined rules.

Functionalities

1. Timesheet Management

- Employees can log their working hours daily.
- Admin can review and approve timesheets.
- Automatic calculation of overtime hours and leave.
- Historical timesheet data is stored for reference and audits.

2. Payroll Calculation

- Calculate salaries based on working hours, overtime, and deductions.
- Generate payslips automatically for employees.
- Apply taxes and contributions as per company policy.
- Integrate with accounting systems if required.

3. Alerts and Notifications

- Notify employees about unsubmitted timesheets.
- Notify managers of pending approvals.
- Generate alerts for discrepancies or missing entries.

4. Reports and Analytics

- Monthly payroll summaries for all employees.
- Timesheet compliance reports for departments.
- Customizable charts for work hours, absences, and payroll costs.

Benefits

- Reduces manual errors in payroll calculations.
- Improves transparency and accountability in attendance tracking.
- Simplifies administrative tasks for HR and management.
- Provides real-time insights into workforce utilization and costs.
